Teleconsult awarded Clusters for Inner City Development Fibre To The Home (FTTH) Project, throughout Indonesia

PT Mega Akses Persada has started awarding Clusters of FTTH Development of the above Project to Teleconsult, which will be connected to their Ultimate Java Ring Project.

The work involves Supervision and Monitoring of the appointed CME construction Contractors, on a daily basis and monitoring the Fibre Optic Testing and Commissioning/ ATP works
PT Mega Akses Persada will be given access to our TIMS system, to store all project data

TIMS is an award winning software developed in Brunei Darussalam, that is a GIS based system with a fully customisable GUI, that can be used to Project Manage and store any data, in any format, for the Project Team.
The Project Team can upload the data directly from the field and Client can access the system immediately.
