

The MRT has been a long time coming in Jakarta and on Oct 10th 2013 ground breaking happened for the Lebak Bulus to Hotel Indonesia phase 1 section, to be completed and taking passengers by march 2019.

The project entails 6km of 2-way tunnel and 7 km of 2-way Elevated sections of track, including 6 underground multi-level stations and 7 elevated stations.

In September 2017 TBG won the rights to supply, install and run the communications systems for the MRT Network which encompasses Leaky feeder, RF and WIFI systems. Then in March 2018 PT Teleconsult Nusantara were awarded the QHSE package by TBG.

This entails producing all the required Quality / Health and safety and Environmental documents & SOP's to the relevant and current standards, Project QHSE file, approval of contractor method statements and drawings, QHSE inductions, Supervision and Approvals for quality of installation as well as daily

monitoring and reporting back to the client. We would like to also take this moment to welcome Pak Budi Listyan, Pak Gun Kuntara, Pak Roni Herviani, Pak Nanang Qoism and Bu Halimah Indri Julita who are all new to the company and now working and representing Teleconsult on the project.
